GRAPHIC DESIGNER BIO:

Graphics by Eileen Bechtold provides design, development, and implementation of visual branding through print and web projects, social media, and internet marketing.

For more than 28 years as a graphic designer, Eileen has been helping the way in which businesses and organizations increase their presence to grow financially and relationally with more clients in today's fast-paced world. Sometimes that means a minor 'marketing face lift' to launch a business into today's technological marketplace; others starting a new business need everything from a logo to printed brochures and a website. Each of those "projects" represents a person, or a family, or many families. And when they succeed, Eileen feels a proprietary pride in their success.

In 2010, in addition to her own freelance business, Eileen joined forces with noted marketing advice expert **John Arnold** and his marketing agency to provide graphic design services for their client base, while receiving expansive training in all the latest small business marketing tools and strategies including Search Engine Optimization, Web Analytics, Search Engine Marketing, Online Display Advertising, E-mail Marketing, and Social Media Marketing.

Recently, Eileen has partnered with noted Pinterest authority and author, **Beth Hayden**, and EMS sourcing company **Williams 6**, to provide a full spectrum of graphic design services to their clients.

As you consider your organization's graphic design needs, visit the **Graphics by Eileen Bechtold website** to view design samples and project information.
